[1] In a Magento store these can be HOME, PLP, PDP, CART, CMS PAGES, CHECKOUT, SEARCH, MY ACCOUNT, ERP INTEGRATION.

[2] For dross-browser and cross-device these should include particular browser and device models to reproduce the bug and fix it

USE COMMAND-ENTER (soft enter) to create line breaks and empty lines in description within one cell.

[3] You can use screencast.com or any other tool to capture and share screenshots

[4] Add video ONLY, where there are multiple steps involved and developer will benefit from video to understand EXACTLy, what is the problem and how to reproduce it. VIDEO does not substitute for good description and how to reproduce steps.
